Acknowledgements

I'd like to acknowledge several people who helped make this podcast possible. First, thanks to the creators of SMT-Pod, and specifically to Jenny Beavers, Megan Lyons, and Melissa Hoag for their guidance and peer review of this episode. I'm grateful to Paula Hickner, head of the Lucille Caudill Little Fine Arts Library at the University of Kentucky, who speedily procured the Music Theory YouTube article for me at the eleventh hour. I would also like to thank Daniel Ehrlich and Lori Miller in the Office of Research Integrity for their help with the Institutional Review Board (IRB) application and process. An enormous thank to friend and mentor Richard Bass, whose pedagogy and scholarship informed the design of my Techniques and Transformations special topics seminar, and I appreciate his taking the time to Zoom with the graduate students for an entire class session. This endeavor would have been impossible without the generous assistance of Aaron Hynds, who served as a guest lecturer, assisted students with tech questions, spent several hours recording me reading this script, and who primarily edited and produced the episode. And, finally, to the graduate students in the 19th century music seminar, thank you for your support and willing participation in this experiment. Your enthusiasm for the class and project inspired me to see this adventure all the way through from inception to completion; thanks for taking this journey with me.
